Hands on Program

Bring your Office Into the Diamond Age

Discover the interactive and expanding role the dental hygienist can play in the modern practice. Your hygienist will be shown how to “Treat to Health” in a manageable time frame, and find increasing satisfaction. There is also a strong emphasis on team participation, and the role hygiene plays in reaching the overall practice goals.

The objectives of this course is to assist Doctors and Hygienists to eradicate perio disease and its links to our bodies, while creating a co-managment relationship with patients and physicans.

Objectives

- *Oral Systemic Links- The science and application*
- *Risk assessment and its role in treatment planning*
- *Case management*
- *Time considerations for treating to health*
- *Restorative recommendations and knowledge of materials*
- *Chair-side recommendations to introduce occlusal signs and symptoms*
- *Becoming an effective communicator and unlocking your patient’s needs and wants*
